

INTERACTIVE HEALTHCARE TV & WIRELESS SYSTEMS

# RAISING HEALTH AWARENESS WITH IPTV

Informing general public about health issues and policies is crucial for public health. IPTV provides the unique service of Health TV, where you can broadcast informative programs and videos specially prepared for the community. These programs and videos may include information on protection of health, health policies of the government and you hospital's features.

*SmartSuite aims to raise awareness and promote your hospital's qualifications.*

# IPTV AND Wi-Fi+ IN ONE

Hospital room TVs have important role in increasing motivation and happiness to patients. With SmartSuite, your patients will enjoy IPTV and high speed internet.

We prioritize the happiness of your patients and yours by providing solutions with SmartSuite that is customized specially for you based on your needs.

# SPLENDID EXPERIENCE

## **SmartSuite, more than TV!**

Think about your expectations from a TV, and then multiply it by 10. Because SmartSuite provides the highest quality level seen in hospital smart technologies.

SmartSuite brings many features to you patients' fingertips with its smart remote. These great features include video games, movies, internet access, nurse call integration, greeting with patient's name, city guide, relaxing and motivational videos and educational programs.

# LIMITLESS FULL HD TV CHANNELS

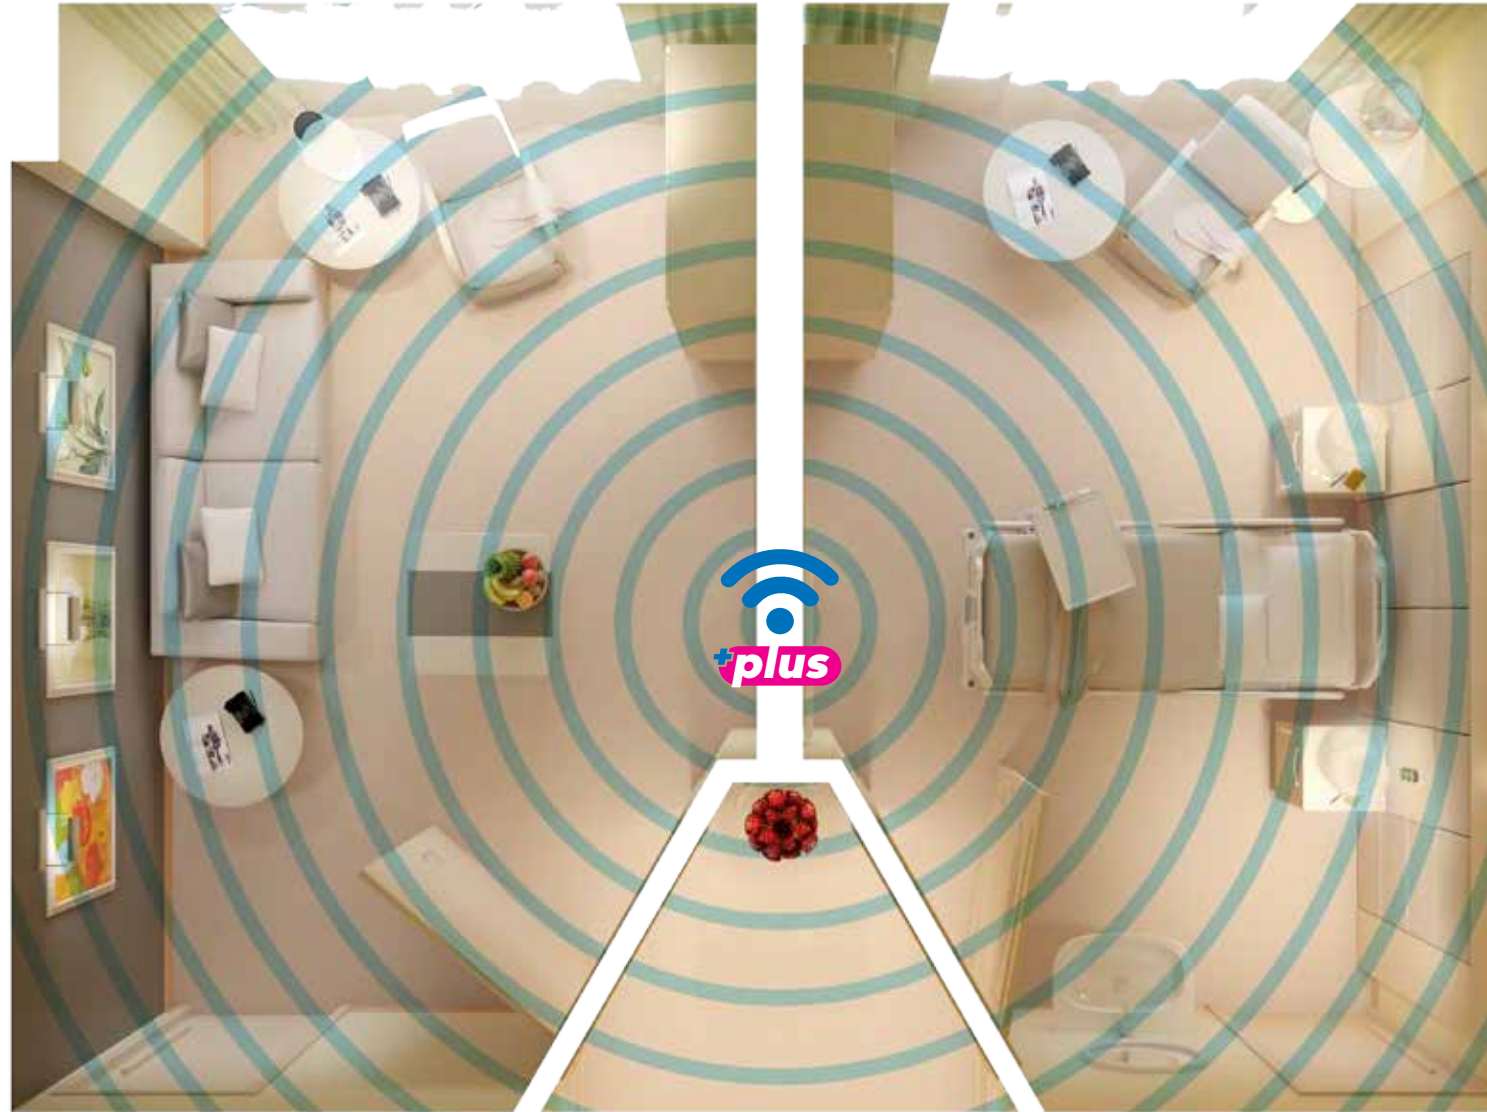

No one should suffer analog TV with picture noises and low quality in this age. Interactive TV brings limitless high quality digital broadcast with a variety of channels and platforms.

We convert all your TVs into interactive ones. Your patients can watch any movie they like with the 'choose and watch module'.

***SmartSuite provides thousands of HD broadcast with limitless channels and this system is also compatible with 4K. This way, you will not need to spend a dime when you will be renewing your TVs in the future.***

Wifi Plus SmartSuite'den yeni hizmet

# HIGH INTERNET SPEED WITH Wi-Fi+

Today, the quality of internet access is our first priority. We do not wish to go anywhere with bad internet connection. Especially in hospitals, patients and visitors spend long hours in hospital rooms and a wireless network installation is a necessity.

**We** create a hotspot access point in each hotel room with Smart IPTV system. This way, your hotel's wireless internet infrastructure is stronger compared to other regular wireless systems.

SmartSuite lowers your expenses by combining Wi-Fi and iTV while increasing your internet and TV performance.

itv

# FLEXIBILITY AND COMPATIBILITY

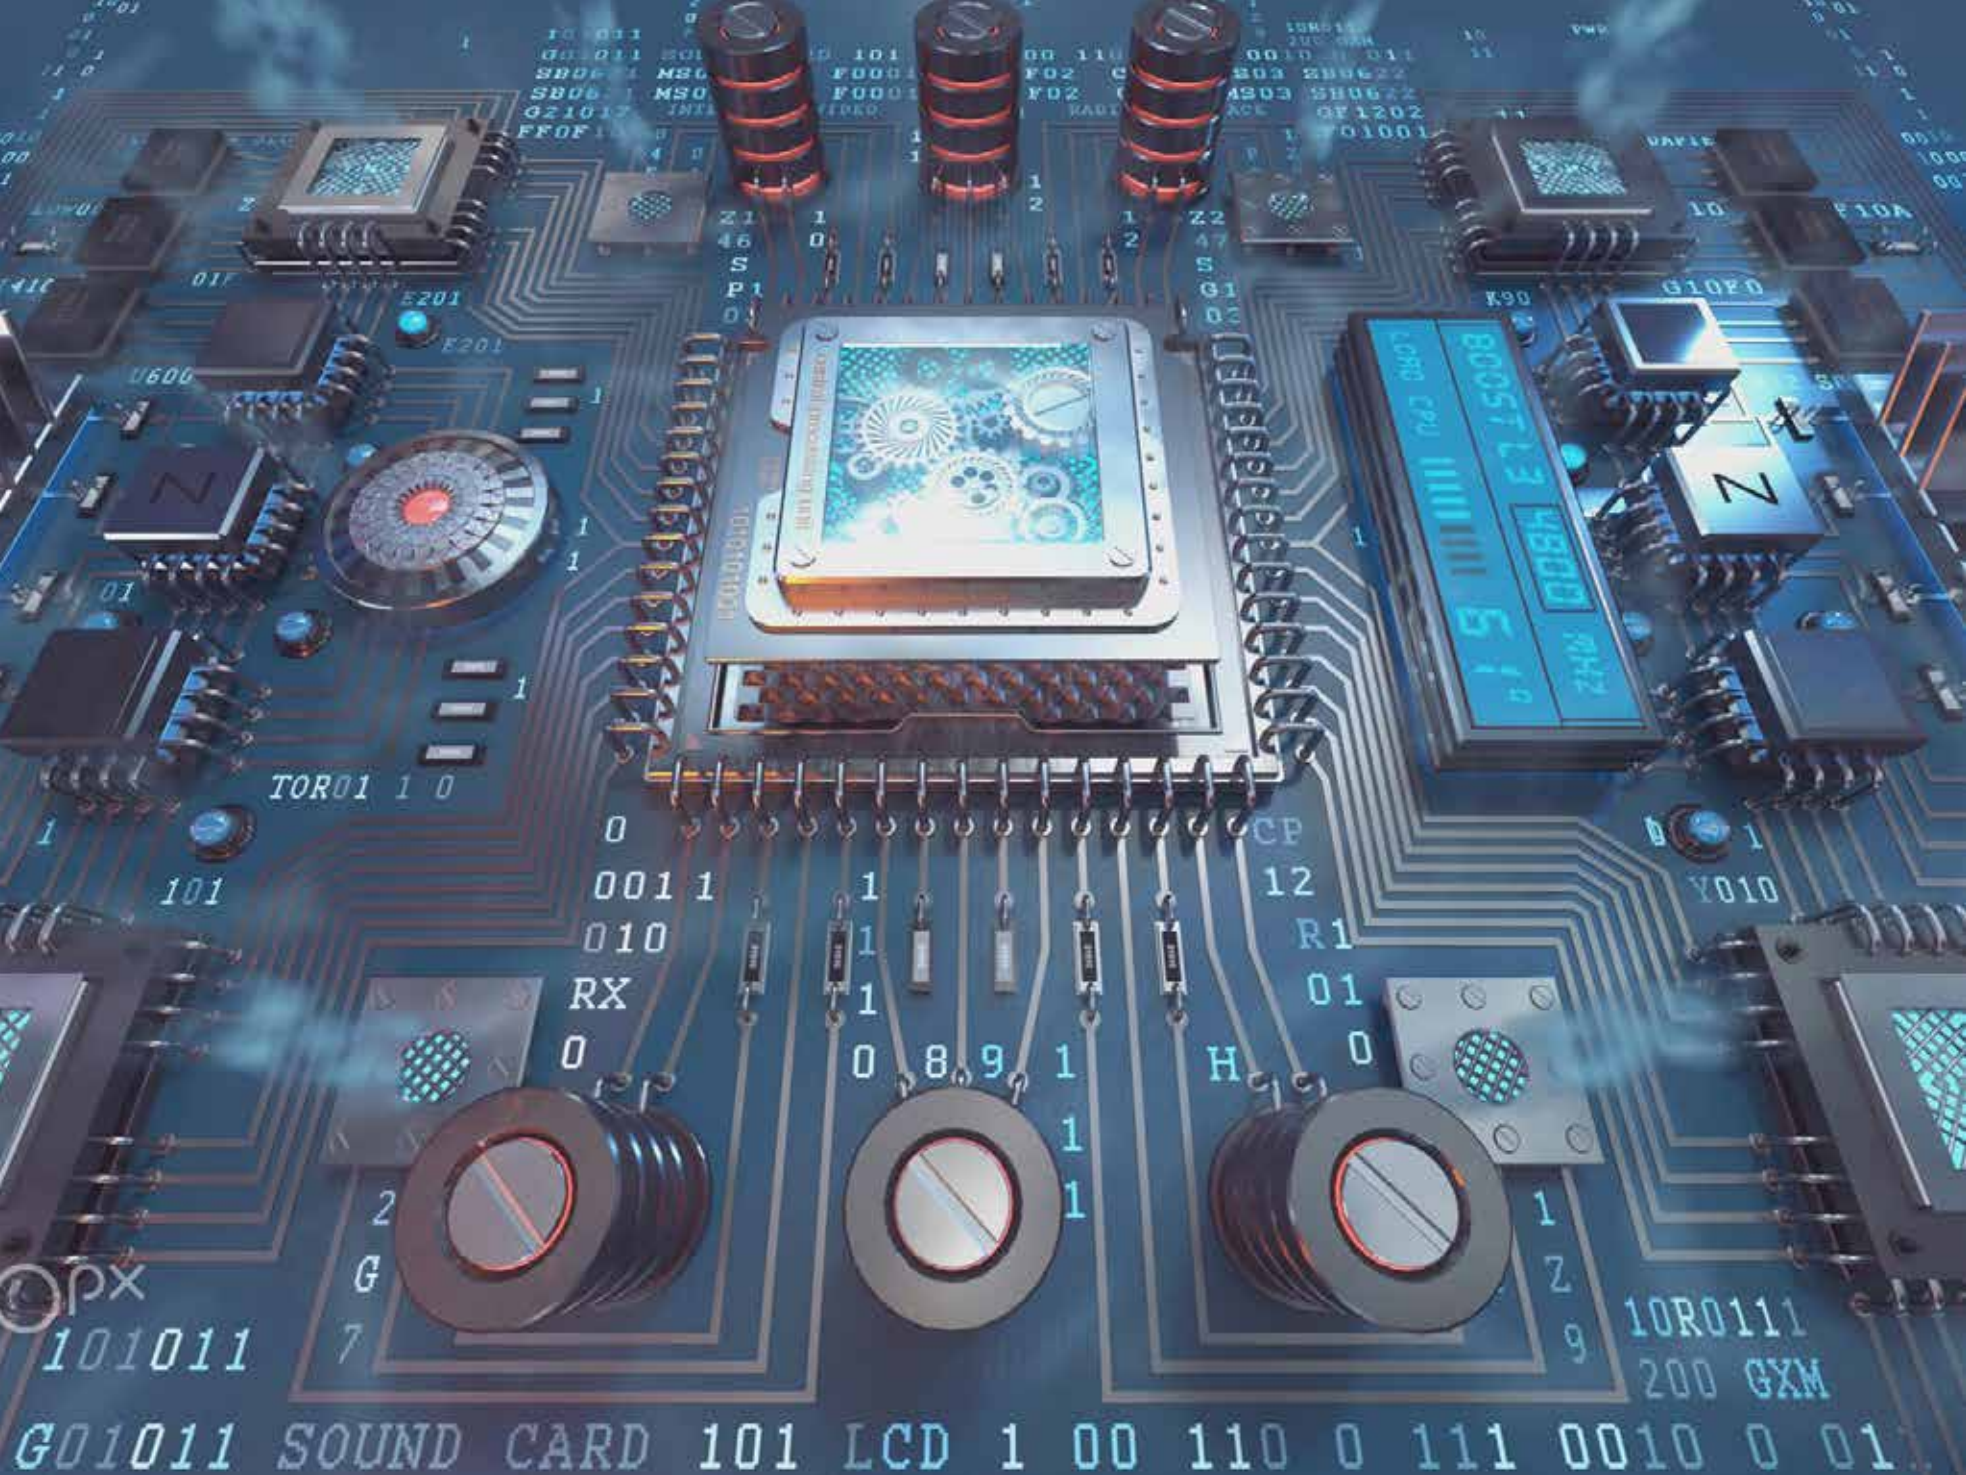

This system design is specialized for you. In order to convert the present TVs into SmartSuite easily,

## **SmartSuite;**

- SmartSuite is compatible with all TVs, no matter the brand or model.
- The system is controlled by only one remote, no extra remote is needed
- It is compatible with hybrid solutions (Ethernet, Coax etc.)
- It is compatible with DVB-S2, DVB-C2 and DVB-T2
- It does not need high speed internet and does not use your internet quota
- It can be specialized and personalized with its modular structure
- The system is easy to manage and maintain

# FIRST CLASS PERFORMANCE

SmartSuite equipment are specially designed for professional usage and it is the fastest interactive TV system you have seen. Forget about the old and slow smart TV software. With SmartSuite's speed, flexibility and quality, you will experience a brand new TV system.

*The fastest processor  
ever made*
